### About Applied Broadband

Established in 2004, Applied Broadband is a trusted industry advisor to network operators, technology vendors and industry consortiums based on its legacy of innovation and expertise in broadband network architectures, technologies, protocols, standards and software. Applied Broadband offers innovative and practical software components, methodologies and network models to augment internal engineering resources and reduce the cost, time-to-market and risk of deployment for next generation networks and services while enhancing the overall service experience for end customers.

### Software

Applied Broadband's Pipeline™ Broadband Intelligence Product Suite includes an enhanced Universal IP Detail Record (IPDR) Engine as well as six key applications that can be implemented individually or as a bundled solution. They include Pipeline Pump™, Pipeline Refinery™, Pipeline Meter™, Pipeline Gate™, Pipeline Analytics Toolkit™, and Pipeline Emulator™. Proven to scale to the performance and reliability requirements of today's massive DOCSIS® networks, Pipeline addresses cable operators' need to extract actionable historical and real-time intelligence from their networks to address metered billing, bandwidth management, subscriber policy enforcement, and other business objectives.

### Services

Applied Broadband offers an extensive range of voice, video, and data technology engineering services in three key expertise domains: Network Engineering; Software Engineering; and Systems Architecture with the objectives of reducing customer costs, time-to-market, and deployment risk while enhancing the end subscriber's service experience.

### Management

Jason Schnitzer | Founder & Principal

Jeff Pedigo | Director of Software Development

Andrew Sundelin | Director of Architecture

John Thompson | Senior Engineer, Quality Assurance and Customer Support

Sonia Schnitzer | Director of Marketing & Administration

### Operations

Applied Broadband's headquarters are located in Boulder, Colorado with ancillary offices in Vancouver, British Columbia. 7/24 Technical Support is available for customers using Applied Broadband's proprietary Pipeline™ software by calling 1-866-993-0781 or emailing [support@appliedbroadband.com](mailto:support@appliedbroadband.com)

### Contact Us

For more information about the Pipeline or other Applied Broadband software and services, visit [www.appliedbroadband.com](http://www.appliedbroadband.com) or contact us directly at [sales@appliedbroadband.com](mailto:sales@appliedbroadband.com).
